

BEACH FILTERS *Clear The Air*

Looking to put something new on the menu?

Beach Filters FDA compliant Air Filters can do just that. Our T-Line filters offer more versatility by meeting these standards and open up the ability to service an even wider range of customers. Just like our T-Line filters, Beach's FDA T-Line still has 3 stage filtration, 0.3 micron particulate filtration and removal of water and hydrocarbon vapor from gas streams. We have replaced the standard gasket and seals, upgraded to an FDA compliant lubricant, and added a step to our parts cleaning process to meet this new standard. Beach's FDA T-Line has the same high quality specifications from our T-Line and remains fundamentally unchanged.

ORIGINAL & RELIABLE

Like all Beach Filters, our In-Line Filters remove oil vapors, hydrocarbons, moisture, and particulates down to 0.3 microns. They offer a simple fool proof engineering design with three basic models available for your needs. 20-1200 scfm and 100-250 psi, a wide variety of applications can be supported by the In-Line Filter.

MORE THAN YOUR STANDARD FILTER

Two specialty filters, the F-GGC, a small disposable unit, and the F-40C, small unit with mounting brackets and element, are unique to Beach Filters line-up. They are the ideal, and highly efficient, point-of-use desiccant type filter for compression air and gasses from 5 to 15 scfm. Offering excellent resistance to synthetic oils, hydrocarbons, solvents, and caustic acids they maintain a clear view body with UV resistance.

Distributor support includes:

- Shipping Within 24 Hours
- Personal Service On Every Order
